

Programming Assignment

(1) Compute the root of the following equations using: (a) Newton-Raphson, (b) Muller Method, (c) 6th order method – and compare the results

(i) $x^3 - \frac{1}{2} = 0, \quad x_o = 0, \quad x_1 = 1, \quad x_2 = 1/2$

(ii) $\log_{10} x - x + 3 = 0, \quad x_o = 1/4, \quad x_1 = 1/2, \quad x_2 = 1$
